Reasons for Allowance:

The independent claims recite databases which are provided by a first party and another party that provide limited access information to individuals in a target group and limitations for the following:

"receiving a first database containing limited access information relative to individuals in a target group from a first party wishing to distribute the limited access data to such individuals and wherein such first database includes code authorization to access limited access data by an individual", "receiving a second database from the first party containing a multiplicity of attributes which are unique to a given individual in the target group", "applying a third database of a plurality of advertising messages that are transmittable over the Internet, wherein the third database is not provided by the first party" and "culling attributes for the individual from the second database based on their code"

The prior art teaches a first database, second database and third database with limited access information and advertising messages. The prior art is different because it does not teach that the first and second databases are provided by a first party and the third database is provided by another party. In addition, the prior art does not teach the culling of attributes in the second database using the code. New search updates revealed not other prior art which teaches the limitations in the context of the claims. Therefore, Claims 45-54 are indicated allowable.
